Danfoss

Clip-on system Coils for solenoid valves

The new Danfoss coils for solenoid valves are specially designed to operate in the aggressive environment of high humidity and temperature fluctuations that you find in most refrigeration systems.

**Refrigeration and
Air Conditioning**

Coils for solenoid valves

The new Clip-on fastening system ensures a faultless installation and makes the coils easy to mount and dismount. A Danfoss Clip-on coil can be mounted without any tools at all, and it is simple to dismount the coil by the means of a screwdriver.

The Clip-on fastening system now forms an integrated part of the coils, which reduces the total number of parts. Moreover, this has enabled us to obtain a better sealing of the coil. To the benefit of the environment we can hereby avoid impregnation of the coil.

The Clip-on system is available for the entire range of Danfoss solenoid valves for refrigeration, freezing and air conditioning purposes, normally open (NO) as well as the normally closed (NC) types.

The new coils are available with the same range of standard connections as the existing Danfoss range of encapsulated coils for solenoid valves, namely; 3-core cable, terminal box, DIN plugs and DIN sockets.

The three main advantages

Improved sealing

Reduced number of parts

Easy mounting and dismounting – "Fool proofed"
