## Environmental Control

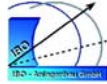

Exhaust systems with gas treatment and separation of solid particles in all areas of the casting process.

Filters and Ventilation

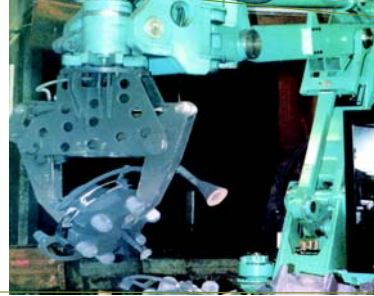

Extraction hood Tornado

## Handling

Casting manipulators with multiple functions.

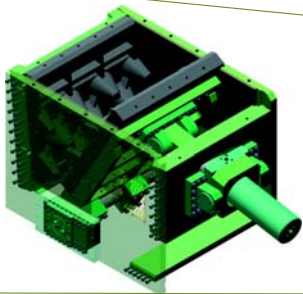

Tele-manipulators

## Crusher for Runners

Leading-edge Japanese technology for foundry runners recycling.

Runner Breaker

## Impact Hammers

Air hammers for separating castings and gatings.

Impact hammers

## Finishing

Casting, fettling and trimming systems, including control of nodularity, cracks, thickness, etc.

Presses

Testing lines

**SERF**

A Senstar Technology Company

## Hydraulic Wedges

Hydraulic wedges for separating castings and gatings.

Hydraulic wedges

## Vertical Moulding

Vertical moulding lines. Coreshooters for many processes.

Vertical moulding machines

Core machines

**DISA**

## Sand Mixers

Complete systems for the reclamation and preparation of green sand; intensive sand mixers; compactability and strength control systems for green sand.

Mixers

Monitoring of compactability

**DISA**

## Shot Blast

DISA is one of the world leaders in the supply of shot blast solutions for the foundry and metal working industries.

Full range of shot blast machines

**DISA**

## Shake-Out

Rotating drum systems for shake-out and sand and castings cooling.

Disacool

**DISA**

## Jolt-Squeeze Moulding

More than 40 years experience and over 1000 installations running around the globe.

NEW ARPA Jolt-Squeeze moulding machines

**DISA**

## Krier Africa

Partner to the foundry industry for more than 35 years. Synergy thru Commitment and Innovation!
