

Styria

STAINLESS STEEL FABRICATION

In its extensive facilities in Sebenza, Edenvale, Styria Stainless Steel Fabrication manufactures vessels to 55 tons, up to 40 metres in length and of 6 metres diameter.

Advanced technology and engineering capability are an integral part of a carefully co-ordinated Quality Management System in order to deliver products meeting the highest requirements.

With more than 50 years experience, Styria Stainless Steel Fabrication is a leading fabricator of stainless steels and super alloys for the mining, pulp and paper, sugar, chemical and petroleum industries.

Rolled Platework

Styria Stainless steel Fabrication can manufacture stainless steel platework in virtually any size and configuration, ranging from simple flanged ducting to heavy offset cones.
