

Danfoss Compressors

- universal, innovative and energy-saving

- A, A+, A++
- COP level:
1.79 (ASHRAE)
1.40 (CECOMAF)
- Capacity: 40-190 W
- 24-hour customer service
- One starting device for all compressor models

Innovation springs from experience and knowledge of users' demands. That is why Danfoss is at the forefront of the rapid development within compressor technology. We do not rest on our laurels. For more than 50 years we have provided the global market with compressors.

With Danfoss as your partner, you will always be at the cutting edge of innovation. Danfoss – the number one choice of the world's leading refrigeration OEM manufacturers.

High Energy Efficient Compressors

X-treme

REFRIGERATION AND
AIR CONDITIONING

...these high-energy, efficient compressors give you the following benefits:

- High efficiency: COP level 1.79 (ASHRAE) / 1.40 (CECOMAF)
- Low sound emission
- Very low gas pulsation
- High flexibility due to just-in-time deliveries
- Proven cabinet tests
- Four COP levels with only one X compressor
- Low energy costs and long lifetime
- One starting device for all compressors

Option:

You can easily reach 5 COP points more with the e-PTC. It has the same size as and looks like a traditional PTC. Simple mounting without extra tooling or wiring.

We have reached new heights

Danfoss confirms its competitive edge in compressor technology

Danfoss TLX and NLX compressors are the answer to the latest energy requirements. The most efficient and silent compressors currently available, they exceed even the most stringent energy requirements for high-class refrigerators and freezers.

Best-in-class performance
 Whatever the energy class, Danfoss has a compressor to match. For A, A+ and A++ applications, the TLX and NLX compressors are the best choice.

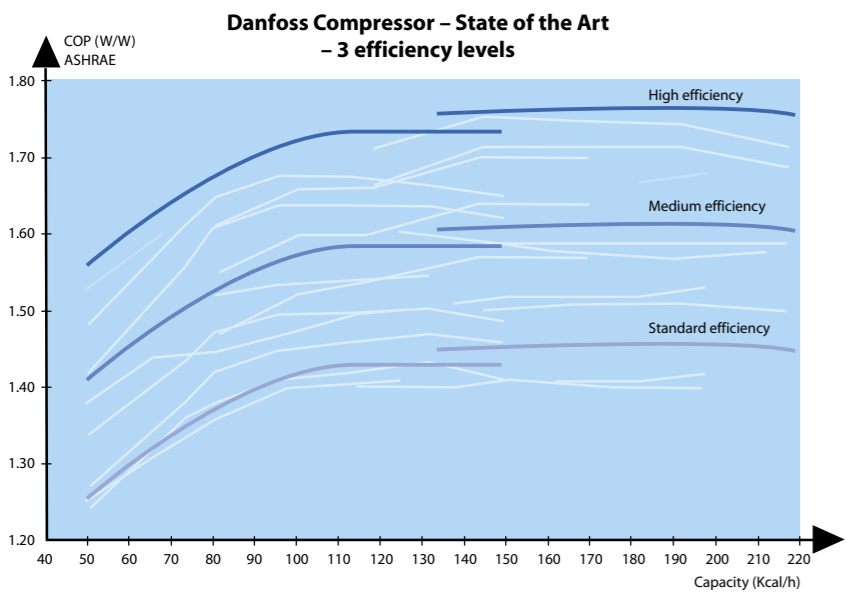

appliances and are very satisfied both with their unsurpassed performance and competitive pricing.

Danfoss – a partner with great application and product know-how
 Our application engineering department, traceable test facilities, laboratories, R&D department and all-round understanding of cooling are second-to-none. We place a high priority on service and technical support and, with production plants in Europe and sales and service

-treme cool

Thanks to the optimizing of the motor, pump and gas flow, our compressors have become even more efficient and quiet. Some of our major customers already use the TLX and NLX compressors in their A, A+ and A++

companies worldwide, we are always on hand and ready to respond immediately. More than 50 years' experience of compressor technology have taught us the requirements of our customers – and their customers.

X-tremely high quality
 Our high-class products are a result of our continuous improvement process on COP, sound emission and quality control. The accuracy of all our products is analysed in our own traceable test facilities and laboratories, all of which are approved to ISO 9001 quality and ISO 14001 environmental standards.

- X-tremely flexible**
 One starting device for all compressor models gives you:
- minimized stock costs
 - handling of only one code number
 - flexibility in your production process
 - no possibilities for mistakes
 - support of zero failure philosophy
